A cyber Criminal is hiding information in the below file . capture
the flag ? submit Flag in MD5 Format

Challenge Link: https://s3-eu-west-
1.amazonaws.com/talentchallenges/Forensics/hidden_message.jpg

Let's see exif metadata:

```
1  $ exiftool hidden_message.jpg | grep -i Notice noraj@noraj-
   pc
2  Copyright Notice : b1a1f2855d2428930e0c9c4ce10500d5
```

25 - Crack the Hash - Cryptography

A hacker leaked the below hash online.Can you crack it to know
the password of the CEO? 1ab566b9fa5c0297295743e7c2a6ec27

```
1   $ hashid 1ab566b9fa5c0297295743e7c2a6ec27
2   Analyzing '1ab566b9fa5c0297295743e7c2a6ec27'
3   [+] MD2
4   [+] MD5
5   [+] MD4
6   [+] Double MD5
7   [+] LM
8   [+] RIPEMD-128
9   [+] Haval-128
10  [+] Tiger-128
11  [+] Skein-256(128)
12  [+] Skein-512(128)

17  [+] Domain Cached Credentials
18  [+] Domain Cached Credentials 2
19  [+] DNSSEC(NSEC3)
20  [+] RAdmin v2.x
```

It must be a MD5 hash. I used the findmyhash script but had no result. Then
I tried online on hashkiller.

The flag was Iamtheflag.
