📖 Readme.md

Simple Encryption - Crypto - 175

States :

  Deux fichiers sont mis à notre disposition :

  1 – Un chiffré
  2 – Le script python pour chiffrer

Sources

Resolution:

The "encryption" script xor each character (passed in decimal) with the number 62.

It is enough to do the same to find the flag in clear.

```
encrypted = [ 103 , 107 , 124 , 119 , 106 , 109 , 123 , 125 , 69 , 73 , 91 , 82 , 82 , 97 , 89 , 76 , 91 ,
char = " "
 for nb in Encrypted:
        char + = chr (nb ^ 62 )
 print char
```

YUBITSEC {well_great}
